

# LENSSSEN VUL- EN SLUITTECHNIEK BV Vacuum & no-cap detector VNC-10-18

The VNC-10-18 is an advanced detection system based on inductive sensor measurement.

### Specifications

Conveyor speed:	Up to 60 meters per minute
Cap diameter:	28 mm up to 110 mm
Detection accuracy:	$\pm 1$ mm
Rejection unit:	Pneumatic cylinder
Protection class:	IP65
Power supply:	230 V – 50Hz +/- 10%
Compressed air:	6 bar

No cap detection and vacuum detection

### Options:

System synchronization by using a rotary encoder for a variable conveyor speed

Rejection unit with sliding register
