

PRE-HEAT PH

Description:

This heater brings lids to an adjustable temperature before closing. This makes it easier to close the package. The temperature of this heater is adjustable. The supply of the lid is measured by means of a sensor. If the lid supply stops, the temperature is automatically lowered.

Film: https://www.youtube.com/watch?v=9iD_ZNIH18Y

Advantages:

The heater is used to provide additional heating for PVC-free compound.
Fault closures are kept to a minimum and locking security is maximized.
Burnt lids are reduced to a minimum.

Technical data	
Model	PH-TO-18
Electrical connection	400 Volt – 50 Hz – 2 KW
Dimensions (L x W x H)	35 x 50 x 25cm
Weight	50 kg
