

SORTING ELEVATOR CAPS CEB-09

Description:

The CEB-09 cap sorting elevator is the perfect machine for supplying a closing machine. The storage bunker is filled with caps. The caps are transported upwards by a conveyor belt with cleats. The caps are sorted by an adjustable angle of the sorting section and the action of gravity. At the top of the elevator belt, the sorted caps are pushed to the discharge guide for optional transport to the closing machine.

Film: <https://www.youtube.com/watch?v=cqSXBtjFas>

Advantages:

Depending on different cap sizes, the machine can be set up for a different cap size quickly. The speed of the elevator belt is frequency controlled.

Technical data	
Model	CEB-09
Capacity	Max.300 / Min
Electrical connection	400 Volt - 50 Hz - 1,2 kW
Volume storage bunker	Ca. 250 liter
Dimensions (L x B x H)	1.805 x 950 x 2.650 mm
Weight approx.	250 kg
