

Buffer table

Description:

Buffer table for setting up/supplying and/or collecting empty and full packaging. The buffer table can be placed at the front or back of the line for buffering different types of packaging.

Film: <https://www.youtube.com/watch?v=4cDUkiLfl5A>

Advantages:

Collecting empty and full packaging so production can continue.
Saving time by putting on or taking off the packaging in one go.
Higher capacities are possible when filling and closing.
Different sizes possible.

Options:

Adjusting the buffer table for a different packaging size.
Extension of the buffer table by means of an on or off slide.
Manifold at feed turntable so that the product always reaches the conveyor belt.
Custom-made size piece for different packaging diameters.

Technical data	
Type	BT-14-3-1.25
Capacity	Container dependent
Dimensions L x W x H	Customer-specific
Electrical connection	400 V – 50 Hz
